

NGUYEN CUNG THANH

(+84) 865-576-531 | nguyencungthanh11@gmail.com | [in](#) [thanhnguyen](#) | [Personal Website](#)

EDUCATION

• Sophomore in VinUniversity

Bachelor of Science in Computer Science

September 2024 - Present

◦ CPGA: 3.6/4.0, Dean's List (Fall 24).

◦ Three times received the "Champion of Changes" Award of University (this award honors teams and individuals quarterly for their contributions to innovation, impact, cultural integration, and sustainability criteria). Two times for Math and Algorithm Club and one time for myself.

• Hanoi University of Science High School for Gifted Students

Top 1 high school for gifted student in natural science of Vietnam; Specialized in Mathematics;

July 2021 - May 2024

PUBLICATIONS & PREPRINTS

• Presenter of a first-author paper submitted to International Statistical Conference, Malaysia

Topic: Mathematical Modeling, Dynamical System; Supervisor: Assoc.Prof.Nguyen Ngoc Doanh (VinUniversity; VIASM)

August 2025

[[Paper](#) pg. 110, [Slides](#)]

◦ Prove the main theorem of the paper on MSY in the generalized logistic growth model.

◦ Simulate the figures and verify the proof using Maple.

• Preprint Research: On the largest prime divisor of polynomial and related problem

Topic: Analytic Number Theory; Supervisor: Assoc.Prof.Le Hai Khoi (VIASM)

March 2025

[[Paper](#)]

◦ Processed Submission to International Journal of Number Theory.

• Co-first author research: Some Generalizations of a Geometric Problem from USA TSTST

Topic: Geometry; Supervisor: MSc.Tran Quang Hung (HUS); Magazine: The Mathematical Reflections

July 2024

[[Paper](#)]

◦ Generalized the problem and provided rigorous proofs; drafted the paper.

• Author mathematical problem: Creating problems for the Math Challenge section

Topic: Analytic Number Theory

March 2024

[[Problem](#)]

◦ Applied number theory analysis and Mertens' theorem to create Problem 790 of Pi Journal.

ACHIEVEMENTS

• Consolation prize in the Vietnam National ICPC 2025

November 2025

• Silver medal in Calculus (Group A) at the Undergraduate Student Mathematics Olympiad

April 2025

• Participant of Vietnam Mathematics Olympiad

February 2023

PERSONAL PROJECTS

• Personal Website

[[Website](#)]

◦ Combining Hugo, HTML, CSS, and JavaScript to build a website for sharing personal posts about Mathematics, AI, and other topics; the website also uses Markdown for writing posts with LaTeX support.

RESEARCH EXPERIENCE

• Researcher at Cosmos Lab

Cosmos Lab (A research laboratory in Center of Environmental Intelligence, VinUniversity)

September 2024 - Present

◦ Conducting research on mathematical biosciences and dynamical systems with Assoc.Prof.Nguyen Ngoc Doanh and Professor.Pierre Auger (IRD, Sorbonne Université).

◦ Proficient in using Maple for visualization and computation.

• Research Assistant

Supervisor: Assist.Prof.Nguyen Tuan Binh (VinUniversity)

September 2025 - Present

◦ Weekly presentations on high-dimensional probability and machine learning theory.

◦ Conducting research on Low-Rank Adaptation (LoRA), with a particular focus on fine-tuning Transformer models.

◦ Coding to implement and test phenomena in the project.

ACTIVITIES

• Teaching Assistant

Cmath Education (Specialized mathematics education center for secondary school students)

March 2024 - March 2025

◦ Teaching assistant of Teacher Vo Quoc Ba Can in the top-performing classes.

◦ Tutored for three students who passed the specialized mathematics top high school entrance exam in Vietnam.

• President of Vin Pioneers Club Gen 5

The first and only math club at VinUni

August 2025 - Present

◦ Organized many meaningful activities, including Mentoring Session, Mocktest Exams, Integration Pi, selection VinUni Olympiad Math team and promoting Mathrathon

◦ **Champion of Integration Pi** - A solving integral competition inspired by MIT and organized by Vin Pioneers
